DIY Hummingbird Feeder

Hummingbirds arrive in North Texas early to mid-March and stay until October.

Therefore, there is still time to take on this family project and build your own hummingbird feeder to hang in the backyard. Here's how:

Supplies:

- Water Bottle (plastic)
- Straws
- Scissors
- Hot Glue Gun
- Red & Yellow Foam (for flowers to decorate the feeder)
- Bakers Twine

Instructions:

1. Trace and cut flowers out of foam
2. Poke holes in the water bottle
3. Cut straws and glue (with the hot glue gun) on the holes
4. Glue flowers over the straws
5. Tie Bakers twine around the bottle

How to Make Hummingbird Food:

- ½ cup sugar
 - 2 cups water
1. Bring to boil and let cool
 2. Pour into bird feeder then attach feeder to a tree
