

Recording AUDIO with R20 Multi Track Recorder (ZOOM)

1. Plug the preferred microphone in the Multi Track Recorder:
- For the wired microphones, plug the XLR end into the appropriate input. (If you need Phantom Power, make sure to connect to input 5 through 8 and switch to 48V)

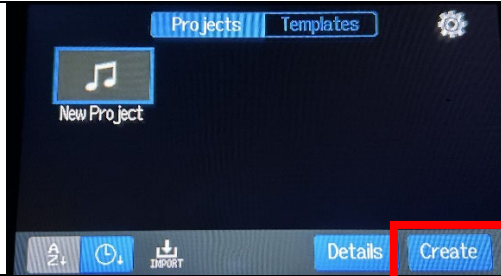

- For the wireless microphones, plug the receiver to input 1 or 2 and turn on one, or both microphones.

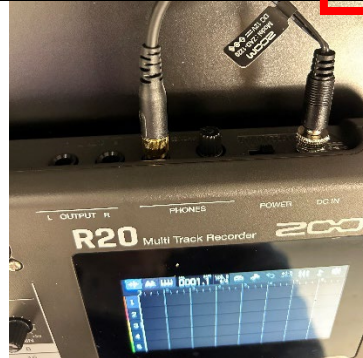

2. Insert your SD card if you wish to save your recording work (It will save it automatically)

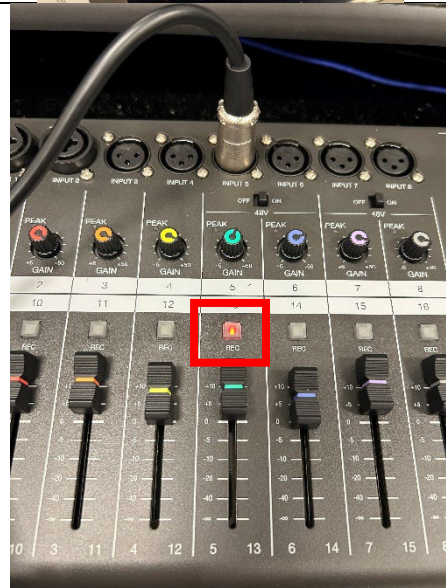

3. When you see new project on the touch screen, hit create to get started.

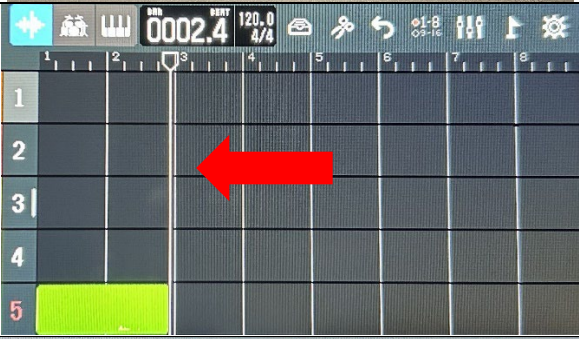

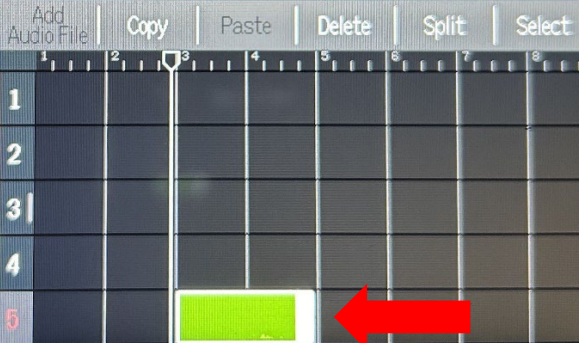

4. Connect headphones to the Multi Track recorder.

5. Press the rec button according to the input chosen.
